The primary objective of the TCRA is to remove the barriers separating collision repair professionals from one another and become a viable state-wide force that obtains positive results for the collision industry in Tennessee.

Together, we have the power to improve the industry. We can determine the best collision repair practices, utilize the most ethical methods, and define which procedures should receive compensation.

We can change the law. Tennessee currently does not have any legislation addressing the collision industry. Through focused lobbying, we can introduce laws that will move the industry and our businesses forward.

### Membership

\$500 per year for corporate sponsorship

\$1000 per year for trade show sponsorship
